

## Thinning Plants (and cats)

Consult your planting guide and/or seed packet to determine the recommended spacing between plants.

When planting your cats make sure to space them 6 inches apart so they have room to grow.

When seedlings are an inch or so tall thin them to the recommended spacing. If the seedlings you wish to remove are immediately next to a seedling you plan to keep, do not attempt to pull it out. In doing so you may harm the root system of the seedling you wish to keep. Instead, cut the unwanted seedling at the soil surface line being careful not to cut the seedling(s) you wish to keep.
